

The Sigma Pulse Wand by LED Creative is a low energy, tubular illumination system that combines both the brightness and look of traditional neon/fluorescent fixtures with the versatility, intensity and highly controllable performance of LED technology.

SIGMA PULSE WAND

LED Creative Sigma Pulse Wands offer a range of tubular baton fixtures capable of delivering stunning LED power, performance and flexibility.

Available as one or two metre units and supplied for rental as comprehensive, eight wand kits, Sigma Pulse Wands are quick to set up and simple to operate - perfect for adding dynamic colour, shape and form to almost any lighting design.

Created as part of the LC Sigma range Pulse Wands offer precise, individual pixel accuracy controlled either directly from a lighting console or by using pixel mapping via a media server. The wands are also fully compatible with both the LED Creative BYTE and Megabyte control systems.

Cost effective, versatile and easy to use, Sigma Pulse Wands are the ideal linear illumination solution for adding creative elements and decorative highlights to media and broadcast entertainment set-ups, visual merchandising installations or architectural builds.
